MASSACHUSETTS DEPARTMENT OF CORRECTION	DEPUTY COMMISSIONER, ADMINISTRATIVE SERVICES DIVISION
TITLE: DESIGN CRITERIA AND PLANNING GUIDELINES	NUMBER: 103 DOC 703

PURPOSE: The purpose of 103 DOC 703.00 is to establish Department of Correction ("Department") policy and guidelines for the planning, design, construction of, and additions to, the Department's institutions and facilities.

REFERENCES: M.G.L. Chapter 124 Section 1 (c) and (q)

APPLICABILITY: Staff **PUBLIC ACCESS:** Yes

MAINTENANCE OF POLICY: Department Central Policy File
Each Institution's Policy File

RESPONSIBLE STAFF FOR IMPLEMENTATION & MONITORING OF POLICY

- Deputy Commissioner of Administrative Services Division
- Superintendents

EFFECTIVE DATE: 07/18/2013

CANCELLATION: 103 DOC 703.00 cancels all previous Department policy statements, bulletins, directives, orders, notices, rules, or regulations regarding the safety and well being of the inmates and staff in correctional institutions which are inconsistent with this policy.

SEVERABILITY CLAUSE: If any part of 103 DOC 703.00 is for any reason held to be in excess of the authority of the Commissioner, such decision shall not affect any other part of this policy.

703.01 **NEEDS EVALUATION**

In accordance with 103 DOC 700, Site Selection Criteria it is the responsibility of the Division of Resource Management to undertake, with the Executive Office of Public Safety and the Division of Capital Asset Management (DCAM), to identify needs and implement plans for construction of new facilities and expansion or renovation to existing facilities. When designing or acquiring any new facility and in planning any substantial expansion or modification of existing facilities, the agency shall consider the effect of the design, or modification upon the agency's ability to protect inmates from sexual abuse.

703.02 **FACILITY LOCATIONS**

1. Any new site proposed for any level of security shall meet the requirements of 103 DOC 700.05, Site Selection Criteria, General Site Criteria.

703.03 **CAPACITY**

1. Feasibility studies in accordance with 103 DOC 700, Site Selection Criteria shall determine capacity of new institutions based on Department needs.
2. Institutions housing more than five-hundred (500) inmates shall be subdivided into units of not more than five-hundred (500) inmates.
3. Where feasible, the population assigned to housing units in existing, renovated or new facilities shall not exceed the design capacity.
4. A managerial objective in Maximum and Medium security levels is a population at rated capacity (90% of design capacity). Rated capacity is considered to be the original design capacity, plus or minus capacity changes resulting from building additions, reductions or revisions. Any changes to rated capacity shall be communicated by the Director of Resource Management to the Directors of Classification and Research and Planning.

703.04 **LOWER SECURITY HOUSING**

When a Minimum or Pre-Release security level institution is part of a Maximum or Medium security level complex, lower security inmates shall be housed separately outside the institution's perimeter security.

703.05 **HANDICAPPED ACCESS**

1. Additions and New Plants

- A. Planning shall provide that all parts of the facility which are accessible to and usable by the public are accessible to and usable by handicapped persons.
- B. Planning shall provide that handicapped inmates are housed in a manner which provides for their safety and security, including the following provisions:
 - 1. Cells or housing units used by them are designed for their use and provide the maximum possible integration with the general population and,
 - 2. Appropriate institution programs and activities are accessible to handicapped inmates confined in the facility.
- C. Planning shall take into account that the number of handicapped accessible cells shall be in accordance with the Americans with Disabilities Act and 521 CMR as administered by the Architectural Access Board (AAB).

2. Existing Facilities

Existing facilities shall comply with 103 DOC 108, Handicapped Access.

703.06

DEPARTMENT OF PUBLIC HEALTH REGULATIONS

1. Department of Public Health Regulations (105 CMR 451, Minimum Health and Sanitation Standards and Inspection Procedures for Correctional Facilities) shall be incorporated into the planning process for new or renovated facilities. 780 CMR State Building Code and 248 CMR Rules and Regulations Governing Plumbers and Gas Fitters, shall be the governing code in their specific discipline where conflicts arise.
2. Existing institutions shall to the extent possible, comply with Public Health regulations, or there is a plan to address any deficiencies within a reasonable time period and subject to the availability of capital funds.

703.07

BUILDING AND FIRE SAFETY CODE REQUIREMENTS

1. Massachusetts Building Codes

Additions or renovations to existing facilities, or new plants, shall be designed and constructed in accordance with the Massachusetts State Building Code, applicable federal laws, and applicable fire safety codes as required by statute and to the extent consistent with essential security requirements. When security requirements are inconsistent with established regulations, variances shall be sought to insure acceptance by the jurisdictional authority.

2. Interior Finishing Materials

Additions or renovations to existing facilities or new facilities shall document that interior finishing materials in inmate living areas, staff areas, exits, and places of public assembly are in accordance with State Building Code and Fire Safety Code requirements.

3. Exits

Additions or renovations to existing facilities or new facilities shall have exits properly positioned, clear, distinctly and permanently marked in order to ensure the timely evacuation of inmates and staff in the event of fire or other emergency. All housing areas and places of public assembly for fifty (50) or more persons shall have a minimum of two (2) exits.

4. Automatic Fire and Carbon Monoxide Detection Systems

The facility shall have an automatic fire and carbon monoxide system that is approved by the State Fire Marshal or the authority having jurisdiction in accordance with 527 CMR Board of Fire Prevention Regulation, or there is a plan to address any deficiencies within a reasonable time period, in accordance with 103 DOC 730, Fire Prevention And Safety Procedures and subject to the availability of capital funds.

5. Automatic Suppression System

Maximum and Medium security level institutions shall also provide automatic suppression systems.

703.08 FACILITY PERIMETER

1. Maximum and Medium Security Levels

The institution perimeter in Maximum and Medium security level institutions shall be constructed in conformance with Attachment I of this policy and shall provide that inmates remain within the perimeter and that access by the general public is denied without authorization.

2. Minimum and Pre-Release Security Levels

The institution perimeter in Minimum and Pre-Release security levels institutions shall be in conformance with Attachment I of this policy.

3. Vehicle and Pedestrian Sally Ports

Maximum and Medium security levels and, where appropriate, Minimum Security Level, institutions shall provide vehicle and pedestrian sally ports between inmate areas and areas providing access to the general public.

4. Watchtowers

If the facility is programmed to have watchtowers, they shall be placed so that an unobstructed view of the grounds and perimeter is permitted and the watchtowers shall be equipped as per 103 DOC 507, Security Equipment.

703.09 GENERAL GUIDELINES

1. Entrance; Maximum, Medium and Minimum security levels .

Each entrance to a Maximum or Medium security level and, where appropriate Minimum institution, shall be constructed as to permit personnel stationed in the control room or secure reception area to observe and identify the person seeking admission, prior to gaining access to a secure area, and shall be in accordance with applicable items in Attachment I of this policy.

2. Adequate Separation

The planning and design shall provide for adequate separation of:

- A. Inmates from the public;
- B. Inmates of one classification from inmates of another;
- C. Inmates from unauthorized areas of the facility.

3. Staff Work Stations and Control Rooms

Staff work stations and control rooms (when used) shall be situated to provide the greatest degree

of observation of traffic flow and supervised internal activities and, consistent with security, the greatest degree of staff/inmate interaction as possible.

4. Staff Surveillance and Movement Control Stations

Staff surveillance and movement control stations shall be separated from the public and inmates by security barriers and shall be protected from direct observation from outside the facility. Program and custodial staff shall generally be dispersed within housing areas for supervisory and programmatic activities.

5. Communication Devices

Communication devices shall be provided between control stations (when used) and staff in living and program areas in accordance with Attachment I of this policy.

6. Staff Offices

Staff offices are located so that they are readily accessible to inmates and there is a minimum of physical barriers separating inmates from staff.

7. No Pad Locks

In new facilities, or renovations to an existing facility, pad locks shall not be used in place of, nor in addition to, a security lock on any door, gate (Site constraint and access for emergency vehicles may require the use of padlocks on fence gates so as not to restrict vehicular access.), or window within the secure perimeter of the institution. All keys and locks shall be in accordance with 103 DOC 502, Control of Locks and Keys and 103 DOC 507, Security Equipment.

8. Traffic Corridor

Traffic corridors shall have a minimum clear width of four (4) feet or as required by the State Building Code.

9. Illumination Levels 9

Illumination levels shall provide, twenty(20) foot-candles at desk and grooming level in living areas, and 100 foot-candles in all work or study areas of the facility.

10. Floor Drains and Emergency Shut-Off Valves

Maximum and Medium security level institutions shall be constructed with floor drains in all living and activity areas and, water supply lines shall be equipped with emergency shut-off valves. Gate valves shall be installed on branch underground lines before their entrance to the building. Floor drains shall be located outside the cell area properly to reduce tampering and flooding. All floor drains shall have tamper proof covers.

11. Emergency Power Source

Each new or renovated facility shall have an emergency power source capable of providing 100% power in the event of a loss of normal power. Existing institutions shall develop a plan to address any deficiencies in this area in accordance with 103 DOC 501, Institution Security Procedures and 103 DOC 730, Fire Prevention and Safety and being subject to the availability of capital funds.

703.10 GENERAL SECURITY

1. General

All general security items shall be in accordance with Attachment I of this policy.

2. Central Control; Maximum and Medium Security Levels

Each Maximum and Medium security level institution shall have a secure central control room with good visibility, which shall be staffed twenty-four (24) hours per day and shall have adequate equipment to monitor and control day to day operations.

3. Communication Systems

All telephone switch room and emergency alarm systems shall be operated from the central control room. Central control shall have access to direct communication with the local police and local fire departments.

4. Electronic Surveillance

Where audio or visual electronic surveillance is used, it shall be located primarily in hallways, elevators, corridors, and perimeter security points such as entrances and exits. All such systems are generally monitored at the central control room. When installing or updating a video monitoring system, electronic surveillance system, or other monitoring technology, the agency shall consider how such technology may enhance the agency's ability to protect inmates from sexual abuse.

5. Pedestrian Sally Port; Maximum and Medium Security Levels.

Each Maximum and Medium security level institution shall have one (1) pedestrian sally port for the temporary holding of persons entering the institution to prevent the introduction of weapons or other contraband. The sally port shall include staff surveillance, a metal detector or similar equipment, a search area, and shall have remote control, and interlocking doors.

6. Vehicle Sally Port; Maximum and Medium Security Levels

Each Maximum and Medium security level institution shall have one (1) vehicular sally port for the temporary holding of vehicles awaiting entrance to the security perimeter of the facility. These sally ports shall have officer's stations and a search area, a storage depot for weapons, interlocking gates and locks, and remote control (located at Central Control).

7. Secure Arsenals

Each Maximum and Medium security level institution shall have a secure area for an arsenal located to prohibit any access by inmates but quickly accessible to correctional officers in the event of an emergency. Arsenals shall be in accordance with 103 DOC 507, Security Equipment.

703.11 INTAKE, BOOKING, AND RELEASE AREA

Where appropriate, institutions shall have an intake, booking, and release area that is located inside the security perimeter but outside inmate living quarters. This area/building shall be located so as to have easy access to the Health Services area. This area shall provide for the following components:

1. booking area;
2. access to drinking water;
3. shower facilities, operable toilets, and wash areas;
4. secure storage for inmates' personal property;
5. telephone facilities;
6. private interview space;
7. temporary holding cells and/or areas with sufficient seating;
8. I.D. areas;
9. medical exam room;
10. support areas.

Planning shall include that the following are incorporated into plans for all living areas:

1. Lighting: General.

Lighting throughout the institution is determined by the tasks to be performed, interior finishes and colors, type and spacing of light sources, outside lighting, and shadows and glare.

2. Lighting: Desk and Personal Grooming Areas

Lighting is at least twenty (20) foot-candles at inmates' rooms/cells desk level and in personal grooming areas.

3. Natural Light: General, Existing, Renovation

All inmates' rooms/cells provide access to natural light.

4. Natural Light: Inmate Rooms / Cells, Confinement of Ten (10) Hours or More, New Construction

Inmates in general population who are confined in their rooms/cells for ten (10) or more hours daily have access to natural light by means of an opening or window of at least three (3) square feet with a view to the outside.

5. Natural Light: Inmate Rooms / Cells, Confinement of Ten (10) Hours or Less; New Construction

Inmates in general population who are confined in their rooms/cells for less than ten (10) hours daily have access to natural light through an opening or window as described in paragraph four above or through an opening or window of at least three (3) square feet between their room/cell and an adjacent space.

6. Lighting: Day Rooms, New Construction

Each day room provides a minimum of twelve (12) square feet of transparent glazing with a view to the outside, plus two (2) additional square feet of glazing per inmate whose room/cell does not contain an opening or window with a view outside.

7. Indoor Air Quality: Existing Facilities

In existing institutions, circulation is at least ten (10) cubic feet of fresh or re-circulated filtered air per minute per occupant for cells/rooms, officer stations, and dining areas. Indoor air quality shall comply with ASHRAE 62-1999.

8. Indoor Air Quality: New Construction, Renovation, Addition

In new construction, renovation, or addition, circulation is at least fifteen (15) cubic feet of fresh or re-circulated filtered air per minute per occupant for cells/rooms, officer stations, and dining areas. Indoor air quality shall comply with ASHRAE62-1999.

9. Temperatures

Temperatures in indoor living and work areas are appropriate to the summer and winter comfort zones per Department of Public Health Regulations.

10. Noise Levels

Noise levels do not exceed seventy (70) decibels (Scale A) in daytime and forty-five (45) decibels (Scale A) at night.

703.13 GENERAL HOUSING AREA REQUIREMENTS

1. Planning: Occupancy Per Cell

Planning shall include that only one (1) inmate occupy a cell designed for single occupancy

unless designated otherwise by the Commissioner due to the needs of the Department.

2. Square Footage Per Cell

All single rooms or cells shall be at least seventy (70) square feet in new plants or building additions. When confinement exceeds ten (10) hours per day there are at least eighty (80) square feet of total floor space per occupant. There should be twenty-five (25) square feet of unencumbered space per occupant and a minimum dimension of seven (7) feet in any one direction.

3. Facilities and Conditions; General Housing Areas for Maximum and Medium Security Levels

In general population Maximum and Medium security level housing, each cell shall have at a minimum, the following facilities and conditions:

A. Sanitation facilities including access to:

1. A toilet above floor level that is available for inmate use without assistance twenty-four (24) hours a day and; and,
2. a wash basin with hot and cold running water;

B. a bed above floor level, writing surface, and proximate area to sit, collapsible hooks or place to store clothes, and space for storage of personal items per 103 DOC 403, Inmate Property;

C. a floor to ceiling height of at least eight (8) feet;

D. observable natural light.

4. Separate Sleeping Quarters for Male and Female

When both males and females are housed in the same building, the facility shall provide separate sleeping quarters and sanitation

facilities which are visually and acoustically separated.

5. Separation of Inmates by Classification

New plants or additions shall be designed and constructed so that inmates can be housed in accordance with 103 CMR 420.00, Classification, and other applicable classification plans.

703.14 MULTIPLE OCCUPANCY HOUSING AREAS

1. Multiple Occupancy Housing Areas: General

When used, multiple occupancy rooms shall house no more than fifty (50) inmates, unless designated otherwise by the Commissioner due to the needs of the Department. These shall be used for inmates who have been screened for suitability to group living. These areas shall provide the following:

- A. Continued observation by staff;
- B. a minimum floor area of sixty (60) square feet per occupant. There should be twenty-five (25) square feet of unencumbered space per occupant with a minimum dimension of seven (7) feet in any one direction and a minimum floor to ceiling height of not less than eight (8) feet;
- C. Plumbing and fixtures shall comply with 248 CMR (State Plumbing Code). The number of toilets shall be in the ratio of 1 toilet for every 8 male inmates and 1 toilet to every 6 female inmates. Showers shall be in the ratio of 1 shower to every 8 inmates and 1 lavatory for every 6 inmates.
- D. natural light;
- E. beds above floor level;

F. a locker or storage space for each inmate.

2. Planning: Maximum and Medium Security Levels

Planning for new facilities shall preclude the use of multiple occupancy housing in Maximum and Medium security level institutions

3. Planning: Medium Security Level

Planning for multiple occupancy housing in Medium security level (although not preferred) shall ensure that such areas are programmed for lower security areas within the institution.

4. Planning; Minimum and Pre-Release Security Levels

Planning for multiple occupancy housing shall normally occur at Minimum and Pre-Release security levels only.

5. Inmate Screening

All planning for multiple occupancy housing shall ensure that inmates are screened for group living prior to assignment.

703.15 SPECIAL MANAGEMENT HOUSING AREAS

1. Provision of Special Management Housing Areas.

The facility shall provide special management housing rooms or cells with living conditions which approximate those of the general inmate population. Special management housing units shall provide the following:

- A. Single occupancy rooms or cells with a floor area of at least eighty (80) square feet of which twenty-five (25) square feet is unencumbered space, and a minimum dimension of seven (7) feet in any one direction;
- B. a bed above floor level, writing surface and proximate place to sit;

C. continuous access to the following:

1. above floor toilet facilities;
2. hot and cold running water;
3. observable natural light.

2. Room; Communication and Observation

Planning shall ensure that a room used for special management inmates permits inmates to communicate with staff and has a door which permits observation by staff.

703.16

SECURITY LEVEL MINIMUM AND PRE-RELEASE INSTITUTIONS

Security Level Minimum and Pre-Release inmates shall be housed separately, where feasible, from other inmates and shall be provided the following:

1. A minimum floor area of 60 square feet in multiple occupancy areas in the living area of existing facilities and 70 square feet per cell or room in new facilities;
2. toilet and shower facilities at a ratio of one operable unit for every eight male occupants and one operable unit for every six (6) female occupants, or per the Massachusetts Plumbing Code;
3. access to one operable wash basin with hot and cold running water for every six occupants, or per the Massachusetts Plumbing Code;
4. natural light;
5. bed above floor level;
6. Closet/locker space for each occupant.

703.17 **HEALTH SERVICE UNITS**

1. Health Service Unit, Quarantine Rooms, Mental Health

Each Maximum and Medium security level institution shall have a suitably equipped Health Service Unit (HSU). Planning shall include bed space for between two (2) to three (3) percent of the population, quarantine rooms, and rooms for mental health related problems to be used for "at risk" inmates, temporary stabilization of inmates, and mental health evaluations.

2. Mental Health Beds

Mental Health related beds shall provide for continuous staff observation.

3. Health Service Units; Planning

Planning and design of HSUs shall be done in accordance with DOC Health Services policies and in conjunction with the Directors of Health Services and the Division of Resource Management.

703.18 **DAY ROOMS**

1. Space Requirements

The facility shall provide a separate day room leisure time space for each cell block or general population housing unit. New construction day rooms shall contain a minimum of thirty-five (35) square feet per inmate for the maximum number of inmates who are estimated to use the day room at one time. Day room space may vary depending on the type of inmates, program and work opportunities, and recreational opportunities. No day room encompasses less than one-hundred (100) square feet of space (exclusive of lavatories, showers, and toilets).

2. Furnishings

Day rooms provide sufficient seating and writing surfaces for every inmate using the day room at one time. Day room furnishings are consistent with the custody level of the inmates assigned.

703.19 ACTIVITY AND EXERCISE AREAS

1. Exercise Space

The facility shall provide space outside the room or cell for inmate exercise.

2. Multi-Purpose Room

The facility shall provide at least one (1) multipurpose room available for inmate activities such as religious services and various treatment services.

3. Accessibility to Toilets and Wash Basins; Activity Areas

All activity areas shall have toilets and wash basins which are accessible to persons using the area. The area shall provide the following conditions:

- A. Lighting is appropriate to the activity area per the building code;
- B. circulation is ten (10) cubic feet of fresh purified air per minute per occupant;
- C. temperatures are appropriate to the summer and winter comfort zones with consideration for the activity being performed;

4. Exercise Area; Institutions Under One Hundred Inmates

A. Outdoor Exercise Areas

Fifteen (15) square feet per inmate for the number of inmates expected to use the space at one time, but not less than one thousand five hundred (1500) square feet of unencumbered space.

B. Covered/Enclosed Exercise Areas

Fifteen (15) square feet per inmate for the number of inmates expected to use the space at one time, a minimum ceiling height of eighteen (18) feet, but not less than five-hundred (500) square feet of unencumbered space.

5. Indoor Recreation Space; Planning; Maximum and Medium Security Levels.

In new Maximum and Medium security level institutions, planning shall include a separate indoor recreation space for vigorous exercise which is not less than sixty (60) feet by one-hundred (100) feet with a ceiling height of not less than twenty-two (22) feet.

6. Outdoor Recreation Areas; Maximum and Medium Security Levels; Facilities Up to One Thousand Inmates

In new Maximum and Medium security level institutions of up to one thousand (1000) inmates there is a minimum of two (2) areas of outdoor recreation space. In urban facilities outdoor recreation space shall be programmed on a site specific basis with availability of land as a primary concern.

703.20 **EDUCATION AND VOCATIONAL AREAS**

1. Classrooms

In facilities offering academic and vocational training programs, classrooms shall be designed in cooperation with the Department's Education Division and Division of Resource Management.

2. General Library

Each institution shall maintain a general library for use by inmates.

3. Law Library

Each institution of two-hundred (200) inmates or greater shall maintain, or provide access to, the services of a law library.

4. Educational, Vocational, and Industrial Areas; General

All educational, vocational, and industrial areas shall be designed in conjunction with the Director of Industries and the Division of Resource Management.

703.21 **VISITING FUNCTIONS**

1. Visiting Room or Area

Sufficient space is provided for a visiting room or area for contact visiting and, if necessary, an area for non-contact visiting. All such areas shall be programmed in accordance with 103 DOC 483, Visiting Procedures.

2. Interview Rooms

Each facility shall have observable interview rooms for confidential consultations.

3. Toilet Facilities

There shall be separate toilet facilities for inmates and visitors, both male and female.

4. Screening and Searching Areas and Rooms.

There shall be adequate and designed space to permit screening and searching of both inmates and visitors. Separate search rooms shall be provided for both inmates and visitors.

5. Lockers

Lockers shall be provided in the administration area for the proper storage of visitors' belongings and other possessions not allowed into the visiting area.

703.22 KITCHEN AND DINING AREAS

1. Planning; General

All food service areas shall be planned, designed, and constructed in accordance with 103 DOC 760, Food Service and 105 CMR 590, State Sanitary Code Chapter X Minimum Sanitation Standards For Food Establishments.

2. Food Preparation Area

The facility shall provide a food preparation area based on population size, and with a minimum of ten (10) square feet of kitchen floor space per inmate.

3. Dining Area

The facility shall provide a dining area designed to accommodate twelve (12) to fifteen (15) square feet per inmate served. The number of inmates served at any one time shall be an administrative decision to be reached in the planning stage in conjunction with the Superintendent, Director of Food Services, and Division of Resource Management.

703.23

STORAGE AREAS

1. Storage of Cleaning Supplies and Equipment

The facility shall provide secure space or janitor closets equipped with a sink for the storage of cleaning supplies and equipment. Provided space is in one or more locations that are accessible to the living and activity areas.

2. Provision of Secure Storage Space

The facility shall provide secure storage space for the following items:

- A. Clothing, bedding, and miscellaneous facility supplies;
- B. inmates' personal property and clothing;
- C. restraining devices and related security equipment which are located in an area which is readily accessible to authorized persons only in the event of emergency;
- D. firearms, ammunition, chemical agents and restraint equipment outside the perimeter in a secure building;
- E. inmate records;
- F. short and long term food storage;
- G. equipment and tools necessary for the maintenance of the buildings and grounds;
- H. toxic, caustic, and flammable materials.

All of the above shall be in accordance with the following DOC policies: 103 DOC 155, Inmate Case Records; 103 CMR 403, Inmate Property; 103 DOC 507, Security Equipment; 103 DOC 508, Firearms; 103 DOC 730, Fire Prevention and Safety; and, 103 DOC 755, Clothing, Linen and Laundry.

703.24

ADMINISTRATIVE SPACE

The facility shall provide support space to include, but not be limited to, administrative space, space for professional and clerical staff, conference rooms, employee locker or storage rooms, employee lounges, space for training, public lobby, and adequate toilet facilities. The number of volunteers expected at a

particular security level shall also be taken into consideration.

703.25 **MECHANICAL AND ELECTRICAL SPACE**

The facility shall provide separate and adequate space for all mechanical and electrical equipment needed for heating, lighting, ventilation, water supply, wastewater treatment, waste removal, and other activities needed to operate the facility. This space shall be approximately eight (8) to twelve (12) percent of the total floor space and/or consistent with design and industry standards.

703.26 **INMATE COMMISSARY**

Space shall be provided for an inmate canteen or commissary, or provisions shall be made for a mobile commissary service.

703.27 **LAUNDRY**

Space shall be provided for a laundry operation sufficient to serve the needs of the institution in accordance with 103 DOC 755, Clothing, Linen, & Laundry and 105 CMR 451, Minimum Health and Sanitation Standards and Inspectional Procedures for Correctional Facilities.

703.28 **FACILITIES FOR WOMEN**

Facilities for women shall generally follow these guidelines. Any adjustments necessary to accommodate female inmates shall be identified and incorporated into the Architectural Program during the planning stage of the project.

103 DOC 703

DESIGN CRITERIA GUIDELINES

These standards, as listed below, are **guidelines** developed by the Department of Correction. They are intended to provide direction and information to all interested parties during any particular phase of a construction project. Although these are guidelines, they may not be modified or deviated from without the review and approval of the Department of Correction's Division of Resource Management.

1. HOUSING AREA WINDOWS

- A. *MAXIMUM SECURITY LEVEL* - In new construction, where the general population is confined for ten (10) hours or more per day, access to natural light by means of an opening or window of at least three (3) square feet with a view to the outside; If confined for less than ten (10) hours per day then there is either access to natural light by means of an opening or window of at least three (3) square feet with a view to the outside or through an opening or window of at least three (3) square feet between their room/cell and an adjacent space.
- B. *MEDIUM SECURITY LEVEL* - Same as *MAXIMUM SECURITY LEVEL*. In existing facilities, window grade may be reduced to *MINIMUM SECURITY LEVEL* if security screen and/or window alarms are incorporated.
- C. *MINIMUM SECURITY LEVEL* - Standard size commercial grade.
- D. *PRE-RELEASE SECURITY LEVEL* - Same as *MINIMUM SECURITY LEVEL*.

2. SECURITY SCREENS

- A. *MAXIMUM SECURITY LEVEL* - Ten (10) mesh per inch; security gauge.

- B. *MEDIUM SECURITY LEVEL* - Twelve (12) mesh per inch; security gauge. In existing facilities Sixteen (16) mesh/inch shall be allowed if incorporated with a window alarm system.
- C. *MINIMUM SECURITY LEVEL* - Sixteen (16) mesh per inch; commercial grade.
- D. *PRE-RELEASE SECURITY LEVEL* - sixteen (16) mesh per inch; commercial grade.

3. PLUMBING FIXTURES - CELL / BEDROOM

- A. *MAXIMUM SECURITY LEVEL* - Colored epoxy coated stainless steel, heavy duty correctional use; serviced via a locked chase outside the cell area.
- B. *MEDIUM SECURITY LEVEL* - Durable, epoxy colored, stainless steel fixtures and mounting, serviced by a locked chase outside the cell area. Medium facilities, dormitory style housing at existing facilities shall allow vitreous china at a gang bathroom layout.
- C. *MINIMUM SECURITY LEVEL Minimum* - Vitreous china.
- D. *PRE-RELEASE SECURITY LEVEL* - same as *MINIMUM SECURITY LEVEL*.

4. FLOOR DRAINS IN HOUSING AREAS

- A. *MAXIMUM SECURITY LEVEL* - Independent drain system, adjacent to and outside cell; drains required in day rooms; Scupper drains required on mezzanine or tiers.
- B. *MEDIUM SECURITY LEVEL* - Same as *MAXIMUM SECURITY LEVELS*. Medium facilities, dormitory style housing unit requires drains at gang bathroom and laundry areas only.
- C. *MINIMUM SECURITY LEVEL* - Not required.
- D. *PRE-RELEASE SECURITY LEVEL* - Not required.

5. CELL OR BEDROOM DOOR
